

KAHU KORNER

A Message from Kahu

SCUBA-TOLOGY

When I was in college I was a Pre-Med student, which isn't saying very much. Needless to say I had to take a lot of math, physics and a ton of biology classes. Part of my required classes for marine biology was learning how to scuba dive in order to do the coral grafting research in the ocean.

The certified scuba class was held in the deep end of the Olympic size pool. There was a lot of studying before we even dreamed about touching any of the equipment. I learned about CPR, the barometric chamber, oxygen mixtures at different depths, how to read tank gauges and a bunch of other necessary information that can keep you alive way down there in the deep.

After college I moved to Maui and continued to scuba dive and especially deep diving for fish and lobsters. We would go to depths of 80-90 feet where the fish are so tame. It was so calm and peaceful at that depth. Everything moved in slow motion. It's such a different world down there. I believe a big part of the peacefulness was knowing what it took to get there, how long I was able to remain there, and how long it would take me to return to the surface of the water before I ran out of air. This allowed me only ten to fifteen minutes to spear. When it was time to go back up, I squeezed air out of my regulator and made sure I didn't ascend faster than those bubbles or I would be in big trouble.

The biggest lesson learned from scuba diving is to ALWAYS be prepared by knowing the weather conditions, to double check that your gear is in working order and your tank was properly serviced and refilled before usage. Just doing these basic procedures will assure you a 99% safety outcome. And if for some reason your tank malfunctions, your dive partner will know how to share his or her air as both of you return to the surface safely.

The use of scuba gear is to be able to go into places that others will never be able to venture. It is the same way with the Word of God.

We are told to put on the full armor of God before we go into the world. But the armor is useless if you don't study the Word in order to understand and practice what each of these armor pieces are used for. The main idea is not to just get acquainted with it but to know it and its use by heart so that in the event you will have to use it, you will know what to do.

As disciples, we are going into places where we have to fully trust in the God and not to lean on our own understanding.

Pray for Each Other

We ask for your prayers this week May 29, 2022.

We lift to your loving embrace the souls of the nineteen children and two teachers who were killed on Tuesday, May 24th. We ask for your healing presence among those who are injured and for all the children and families of Uvalde.

We ask for the healing of our nation. As we pray once again for those who have been lost by gun violence, may our petitions lead us to action, that we will be vessels of change and peace. We ask that you guide and govern our public officials and all of our people to make this world a safer place for all children. We ask these prayers in Jesus' name. Amen.

Continue to pray for Auntie Mona Joy, Uncle Ben Lum and Char Izuka and lift our prayers to Auntie Abbie Nery who has entered the heavenly kingdom.

Mr. Charles "Charlie" McAuliffe, that his lungs heal and become stronger. We pray for Mrs. Jennifer Sagan Michel, that her cancer goes into remission. We continue to pray for Mililani Byers, Ann Ishikawa, for Kapela Wong, for auntie Keala Kaimimoku, for Michael Auto Antolin, for auntie Claudette DeGarcia, and for auntie Ruby Donlin

Prayers go out to those who need healing mercies, to those who have lost their jobs, to those who have no food or struggling with trying to keep their business alive, and those who are struggling financially and spiritually.

Most of us know of someone who has contracted COVID and we share in your prayers for these people.
